Gold badges are 18K gold-plated, and silver badges are plated with stainless steel. Since they both have a solid steel core, magnets adhere directly to the body of the badge, with no need for a pressure-sensitive steel plate. Sold with or without pin back fasteners. Both sizes offer round corners. Plain frames do not include fasteners, and can be used with the magnetic clips shown on page 203. Insert material must be 1/32" thickness only.
